Freight & Delivery

Domestic Shipping

We use many different couriers and will always strive to deliver your goods in the fastest and cheapest way possible.

International Shipping

We will delivery anywhere in the world. Just contact us for a quotation.

Returns

SAINT Products is not required to provide a refund or replacement if you change your mind. However, if you find one of our products to be defective, or significantly different to the image shown on our website, then we will happily replace the product or provide you with a full refund of the cost of the returned goods. The goods are to be returned to SAINT Products at the customers own cost, prior to the refund being given. If the product deemed to be defective is repairable, we will happily repair it without delay.

It is also a condition of sale, that all goods are not subjected to excessive and unreasonable loads and applications. All nylon products are made to withstand ultraviolet light, however over an extended period of time, these goods will fade and/ or discolour. All stainless steel items are also to be maintained by the customer to ensure they do not tea-stain after extended periods in close proximity to salt water.

Customer Satisfaction

We will always strive to provide you with a timely and reliable service that meets our service standards. We will always provide you with accurate and consistent information and options for your needs. And we will always treat you fairly, with respect and courtesy. Your feedback is always appreciated, whether compliments, suggestions or complaints. What you tell us can help improve our services and products, or correct a problem we may not have been aware of. Please contact us through our website or email us saint.jonathan@saintproducts.com.au and we will respond to your comments promptly.

Privacy

SAINT Products is committed to maintaining your privacy as required by the Privacy and Personal Information Protection Act 1998 (NSW). We will not collect any more information than in necessary for us to fulfil your requests, nor will we disclose your personal information to anyone without your consent. SAINT Products will never give your personal details to anyone!

saintmarineproducts.com.au is a secure site. Additional measures have been put in place when creating this website to ensure the security of our customers credit card and personal information.

Abbreviations Used Throughout this Catalogue

W = Width

ID = Inside Diameter

L = Length

OD = Outside Diameter

H = Height

Camber = Roll/Curve across the beam of frame to give height

D = Diameter

Bow Ends

S200B

Suits 20.0mm O.D. x 1.6mm wall thickness aluminium tube.

Material: UV stabilised Nylon 6
Colour: Black

Centre hole in blade designed to suit 1/4" or M6 screw

S200W

Suits 20.0mm O.D. x 1.6mm wall thickness aluminium tube.

Material: UV stabilised Nylon 6
Colour: White

Centre hole in blade designed to suit 1/4" or M6 screw

S204

Suits 22.2mm (7/8") O.D. x 1.6mm wall thickness stainless steel tube

Material: 316 grade stainless steel.

Centre hole in blade designed to suit 1/4" or M6 screw

S205

Suits 25.4mm (1") O.D. x 1.6mm wall thickness stainless steel tube

Material: 316 grade stainless steel.

Centre hole in blade designed to suit 1/4" or M6 screw

S207

Suits 31.8mm (1 1/4") O.D. x 1.6mm wall thickness stainless steel tube

Material: 316 grade stainless steel
Centre hole in blade designed to suit 5/16" or M8 screw

S208B

Suits 25.0mm O.D. x 3.0mm wall thickness aluminium tube (19.0mm ID)

Material: UV stabilised Nylon 6
Colour: Black

Centre hole in blade designed to suit 1/4" or M6 screw

S208W

Suits 25.0mm O.D. x 3.0mm wall thickness aluminium tube (19.0mm I.D.)

Material: UV stabilised Nylon 6
Colour: White

Centre hole in blade designed to suit 1/4" or M6 screw

S209B

Suits 25.0 O.D. x 1.6mm wall thickness aluminium tube (21.8mm I.D.)

Material: UV stabilised Nylon 6
Colour: Black

Centre hole in blade designed to suit 1/4" or M6 screw

S209W

Suits 25.0mm O.D. x 1.6mm wall thickness aluminium tube (21.8mm I.D.)

Material: UV stabilised Nylon 6
Colour: White

Centre hole in blade designed to suit 1/4" or M6 screw

S210

Material: UV stabilised Nylon 6
Colour: Black

Designed to suit 25.4mm or 25.0mm O.D. x 1.6mm wall thickness tube to reduce the I.D. to 19.0mm.

Ideal for using with a S204 stainless steel Bow End (internal) in 25.0mm x 1.6mm aluminium tube, thus creating a barrier from corrosion when mixing S.S. and Aluminium.

S215

Suits 25.4mm (1") O.D. x 1.6mm wall thickness stainless steel tube

External Style – secures with 1 x grub screw

Material: 316 grade stainless steel
Centre hole in blade designed to suit 5/16" or M8 screw

S217

Suits 31.8mm (1 1/4") O.D. x 1.6mm wall thickness stainless steel tube

External Style – secures with 1 x grub screw

Material: 316 grade stainless steel
Centre hole in blade designed to suit 1/4" or M6 screw

Marine Products

Bow Ends Cont'd

S219

Suits 38.1mm O.D. x 1.6mm wall thickness aluminium tube.

Material: 316 grade stainless steel

Centre hole in blade designed to suit 1/4" or M6 screw

S215-G

Suits 25.4mm (1 1/4") O.D. x 1.6mm wall thickness stainless steel tube
External Style – secures with 1 x grub screw

Material: 316 grade stainless steel
Colour: Gold Plated

Centre hole in blade designed to suit 5/16" or M8 screw

S217-G

Suits 31.8mm (1") O.D. x 1.6mm wall thickness stainless steel tube
External Style – secures with 1 x grub screw

Material: 316 grade stainless steel
Colour: Gold Plated

Centre hole in blade designed to suit 1/4" or M6 screw

S219-G

Suits 38.1mm (1 1/2") O.D. x 1.6mm wall thickness stainless steel tube
External Style – secures with 1 x grub screw

Material: 316 grade stainless steel
Colour: Gold Plated

Centre hole in blade designed to suit 1/4" or M6 screw

S325B

Suits 25.0mm O.D. x 3.0mm wall thickness aluminium tube

Material: UV stabilised nylon 6
Colour: Black

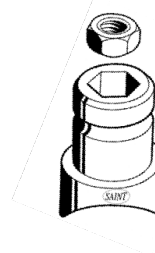

Contains 1/4" UNC captive hex nut
Helps secure two poles at a 90 degree connection

S326B

Suits 25.0mm O.D. x 1.6mm wall thickness aluminium tube

Material: UV stabilised nylon 6
Colour: Black

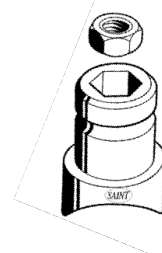

Contains 1/4" UNC captive hex nut
Helps secure two poles at a 90 degree connection

S325W

Suits 25.0mm O.D. x 3.0mm wall thickness aluminium tube

Material: UV stabilised nylon 6
Colour: White

Contains 1/4" UNC captive hex nut
Helps secure two poles at a 90 degree connection

S326W

Suits 25.0mm O.D. x 1.6mm wall thickness aluminium tube
Material: UV stabilised nylon 6

Colour: White
Contains 1/4" UNC captive hex nut
Helps secure two poles at a 90 degree connection

Knuckles

S220B

Suits 20.0mm O.D. aluminium tube
Style: Tapped Nylon Thread

Material: UV stabilised Nylon 6
Colour: Black

Comes with a 7/8" long combination mush head 304 s/s screw x 1/4" UNC thread

S220W

Suits 20.0mm O.D. aluminium tube
Style: Tapped Nylon Thread

Material: UV stabilised Nylon 6
Colour: White

Comes with a 7/8" long combination mush head 304 s/s screw x 1/4" UNC thread

S221B

Suits 19.0mm O.D. aluminium tube
Style: Tapped Nylon Thread

Material: UV stabilised Nylon 6
Colour: Black

Comes with a 7/8" long combination mush head 304 s/s screw x 1/4" UNC thread

S221W

Suits 19.0mm O.D. aluminium tube
Style: Tapped Nylon Thread

Material: UV stabilised Nylon 6
Colour: White

Comes with a 7/8" long combination mush head 304 s/s screw x 1/4" UNC thread

Marine Products

Knuckles Cont'd

S224

Suits 22.2mm (7/8") O.D. stainless steel tube

Style: Non-hinged fitting, secures to tube with grub screw

Material: 316 grade stainless steel

Comes with a 7/8" long philip pan head 304 s/s screw x 1/4" UNC thread and a 1/4" UNC grub screw

S225

Suits 25.4mm (1") O.D. stainless steel tube

Style: Non-hinged fitting, secures to tube with grub screw

Material: 316 grade stainless steel

Comes with a 1" long combination mush head 304 s/s screw x 1/4" UNC thread and a 1/4" UNC grub screw

S227

Suits 31.8mm (1 1/4") O.D. stainless steel tube

Style: Non-hinged fitting, secures to tube with 2 x grub screws Material: 316 grade stainless steel Comes with an M8 socket head screw and 2 x M6 grub screw

S228B

Suits 22.0mm O.D. aluminium tube

Style: Captive Nut Thread

Material: UV stabilised Nylon 6

Colour: Black

Comes with a 1" long philip pan head 304 s/s screw x 1/4" UNC thread and a captive 1/4" UNC 304 s/s hex nut

S228W

Suits 22.0mm O.D. aluminium tube

Style: Captive Nut Thread Material: UV stabilised Nylon 6

Colour: White

Comes with a 1" long philip pan head 304 s/s screw x 1/4" UNC thread and a captive 1/4" UNC 304 s/s hex nut

S229B

Suits 25.0mm O.D. aluminium tube

Style: Captive Nut Thread Material: UV stabilised Nylon 6

Colour: Black

Comes with a 1" long philip pan head 304 s/s screw x 1/4" UNC thread and a captive 1/4" UNC 304 s/s hex nut

S229W

Suits 25.0mm O.D. aluminium tube

Style: Captive Nut Thread Material: UV stabilised Nylon 6

Colour: White

Comes with a 1" long philip pan head 304 s/s screw x 1/4" UNC thread and a captive 1/4" UNC 304 s/s hex nut

S230

Suits 25.4mm (1") O.D. stainless steel tube

Material: 316 grade stainless steel

Hinged variety

Hardware: Comes with an M6 socket head screw which clamps the fitting onto the tube and an 1/4" combination screw which secures the bow

S232

Suits 31.8mm (1 1/4") O.D. stainless steel tube

Material: 316 grade stainless steel

Hinged variety

Hardware: Comes with an M6 socket head screw which clamps the fitting onto the tube and an M8 socket head screw which secures the bow end

S238

Suits 38.1mm (1 1/2") O.D. stainless steel tube

Material: 316 grade stainless steel

Hinged variety

Hardware: Comes with two M6 socket head screws which clamp the fitting onto the tube and an M8 socket head screw which secures the bow end

S240

Suits 63.5mm (2 1/2") O.D. stainless steel tube

Material: 316 grade stainless steel

Hinged variety

Hardware: Comes with two M8 socket head screws which clamp the fitting onto the tube and an M8 socket head screw which secures the bow end

S257

Designed to suit 25.4mm O.D. stainless steel tube

Material: 316 grade stainless steel

Comes with 2 x 5/16" screws securing fitting to the tube and 1 x 1/4" UNC combination mush head screw

Marine Products

Knuckles Cont'd

S800B

Suits 22.0mm O.D. aluminium tube
Style: Tapped Nylon Thread
Material: UV stabilised Nylon 6
Colour: Black
Comes with a 1" long philip pan head 304 s/s screw x 1/4" UNC thread

S801B

Suits 25.0mm O.D. aluminium tube
Style: Tapped Nylon Thread Material: UV stabilised Nylon 6
Colour: Black
Comes with a 1" philip pan head 304 s/s screw x 1/4" UNC thread

S801W

Suits 25.0mm O.D. aluminium tube
Style: Tapped Nylon Thread
Material: UV stabilised Nylon 6
Colour: White
Comes with a 1" long philip pan head 304 s/s screw x 1/4" UNC thread

S230-G

Suits 25.4mm (1") O.D. stainless steel tube
Material: 316 grade stainless steel
Colour: Gold Plated
Hinged variety
Hardware: Comes with an M6 socket head screw which clamps the fitting onto the tube and a 1/4" UNC combination mush head screw which secures the bow end

S232-G

Suits 31.8mm (1 1/4") O.D. stainless steel tube
Material: 316 grade stainless steel
Colour: Gold Plated
Hinged variety
Hardware: Comes with an M6 socket head screw which clamps the fitting onto the tube and an M8 socket head screw which secures the bow end

S238-G

Suits 38.1mm (1 1/2") O.D. stainless steel tube
Material: 316 grade stainless steel
Colour: Gold Plated
Hinged variety
Hardware: Comes with two M6 socket head screws which clamp the fitting onto the tube and an M8 socket head screw which secures the bow end

S234B

Suits 32.0mm O.D. aluminium tube
Style: Tapped Nylon Thread Material: UV stabilised Nylon 6
Colour: Black
Comes with a 1" long philip pan head 304 s/s screw x 1/4" UNC thread and grub screw.

Deck Mounts

S250B

Material: UV stabilised nylon 6
Colour: Black
Style: Tapped nylon thread
Flat Base
Comes with a 3/4" long philip pan head 304 s/s screw x 1/4" UNC thread

S250W

Material: UV stabilised nylon 6
Colour: White
Style: Tapped nylon thread
Flat Base
Comes with a 3/4" long philip pan head 304 s/s screw x 1/4" UNC thread

S252

Material: 316 grade stainless steel
Style: Tapped thread
5 degree angled base
Comes with a 3/4" long combination mush head 304 s/s screw x 1/4" UNC thread

S2531B

Material: UV stabilised nylon 6
Colour: Black
5 degree angled base
Designed to suit nylon and stainless steel deck mounts. Fixing holes align.

Marine Products

Deck Mounts Cont'd

S2531W

Material: UV stabilised nylon 6
 Colour: White
 5 degree angled base
 Designed to suit nylon deck mounts.
 Fixing holes align.

S2532B

Material: UV stabilised nylon 6
 Colour: Black
 Curved Base
 Designed to suit nylon and stainless steel deck mounts.
 Fixing holes align.

S2532W

Material: UV stabilised nylon 6
 Colour: White
 Curved Base
 Designed to suit nylon deck mounts.
 Fixing holes align.

S253B

Material: UV stabilised nylon 6
 Colour: Black
 Style: captive s/s nut
 Flat Base
 Comes with a 3/4" long philip pan head 304 s/s screw x 1/4" UNC thread and captive 1/4" UNC hex nut

S253W

Material: UV stabilised nylon 6
 Colour: White
 Style: captive s/s nut
 Flat Base
 Comes with a 3/4" long philip pan head 304 s/s screw x 1/4" UNC thread and captive 1/4" UNC hex nut

S254B

Material: UV stabilised nylon 6
 Colour: Black
 Rotates 180 degree on single line axis
 Comes with a 7/8" combination mush head 304 s/s screw

S254W

Material: UV stabilised nylon 6
 Colour: White
 Rotates 180 degree on single line axis
 Comes with a 7/8" combination mush head 304 s/s screw

S255

Large Style Deck Mount
 Material: 316 grade stainless steel
 Comes with an M8 screw
 Four mounting countersunk holes on base

S256

Material: 316 grade stainless steel
 Style: Quick release pin secured with lanyard
 Flat base
 Same centre to centre base as S252 and all SAINT medium deck mounts

S258

Rotates 360 degree and is secured to base with a S440 Quick Release Pin
 Material: 316 grade stainless steel
 Comes with a 1/4" UNC combination mush head screw which holds bow end to fitting
 Has same mounting holes (centre to centre) of all medium and small deck mounts

S252-G

Material: 316 grade stainless steel
 Style: Tapped thread
 Colour: Gold Plated
 5 degree angled base
 Comes with a 3/4" long combination mush head 304 s/s screw x 1/4" UNC thread

S255-G

Large Style Deck Mount
 Material: 316 grade stainless steel
 Colour: Gold Plated
 Comes with an M8 screw
 Four mounting csk holes on base

Marine Products

Deck Mounts Cont'd

S259B

Material: UV Stabilised Nylon 6
 Colour: Black
 Style: Tapped nylon thread
 Flat Base
 Large deck mount & 2 fixing holes.
 Comes with a 1" long x 1/4" UNC
 pan head head screw

S810B

Material: UV Stabilised Nylon 6
 Colour: Black
 Style: Tapped nylon thread
 Flat Base
 Comes with a 3/4" long x 1/4" UNC
 pan phillips head screw

S810W

Material: UV Stabilised Nylon 6
 Colour: White
 Style: Tapped nylon thread
 Flat Base
 Comes with a 3/4" long x 1/4" UNC
 pan phillips head screw.

S440

Quick Release Pin
 1/4" Dia x 40mm Long
 Material - S316 Stainless Steel
 Compatible with Saint Deck Mounts
 Including S252, S256 & S258.

Tube - Joiners

S280

Suits 20.0mm O.D. x 1.6mm wall
 thickness aluminium tube.
 Machined solid aluminium bar
 Colour: bright silver anodised
 120mm in length

S283

Suits 22.0mm O.D. x 1.6mm wall
 thickness aluminium tube.
 Machined solid aluminium bar
 Colour: bright silver anodised
 120mm in length

S284

Suits 25.0mm O.D. x 3mm wall
 thickness aluminium tube
 Machined solid aluminium bar
 Colour: bright silver anodised
 120mm in length

S285

Suits 25.4mm (1") O.D. x 1.6mm wall
 thickness stainless steel tube.
 Material: 316 grade stainless steel
 Machined from solid bar.
 120mm in length

S286

Suits 25.0mm O.D. x 1.6mm wall
 thickness aluminium tube
 Made from 3mm extruded tube
 Colour: bright silver anodised
 120mm in length

S287

Suits 31.8mm (1 1/4") O.D. x 1.6mm wall
 thickness stainless steel tube
 Material: 316 grade stainless steel
 Machined from solid bar with
 central placed shoulder
 120mm in length

S289

Suits 38.1mm (1 1/2") O.D. x 1.6mm wall
 thickness stainless steel tube
 Material: 316 grade stainless steel
 Machined from solid bar with
 central placed shoulder
 120mm in length

S291

Suits 25.0mm O.D. x 1.6mm wall
 thickness aluminium tube
 Made from 3mm extruded tube
 Colour: bright silver anodised
 2000mm in length

Marine Products

Side Mounts

S260

Material: 316 grade stainless steel
Comes with a 7/8" long combination
mush head screw x 1/4" UNC thread.
2 x Countersunk Fixing holes

S261B

Style: captive s/s nut
Colour: Black
Material: UV stabilised nylon 6
Comes with 7/8" long combination
mush head screw x 1/4" UNC thread
and a 1/4" UNC hex nut

S261W

Style: captive s/s nut
Colour: White
Material: UV stabilised nylon 6
Comes with 7/8" long combination
mush head screw x 1/4" UNC thread
and a 1/4" UNC hex nut

S262

Material: 316 grade stainless steel
Comes with a 5/16" hex head 304
stainless steel screw.
3 x Countersunk Fixing holes

Bow Stay Clips

S320B

Suits 20.0mm O.D. x 1.6mm wall
thickness aluminium tube
Material: UV stabilised nylon 6
Colour: Black

S320W

Suits 20.0mm O.D. x 1.6mm wall
thickness aluminium tube
Material: UV stabilised nylon 6
Colour: White

S322B

Suits 19.0mm O.D. x 1.6mm wall
thickness aluminium tube
Material: UV stabilised nylon 6
Colour: Black

S324B

Suits 22.0mm O.D. x 1.6mm wall
thickness aluminium tube
Material: UV stabilised nylon 6
Colour: Black

S324B-Short

Suits 22.0mm O.D. x 1.6mm wall
thickness aluminium tube
Material: UV stabilised nylon 6
Colour: Black

Marine Products

Rigging

S301

Suits 25.0mm fabric strap Material: 5.0mm dia. O.D. 316 grade stainless steel rod
Ends welded together for additional strength

S303

Material: 5.0mm dia. O.D. 316 grade stainless steel rod

S303a

Material: 6.0mm dia. O.D. 316 grade stainless steel rod Dimensions: mounting holes (centre to centre) 47mm apart

S360

To suit 25.0mm fabric strap Material: Nickle Plated steel
Ends welded together for additional strength
Dimensions: 32.0mm outside width x 26.0mm total height x 3mm dia rod.

S361

To suit 25.0mm fabric strap Material: 316 grade stainless steel; Ends welded together for additional strength
Dimensions: 38.0mm outside width x 28.0mm total height x 4mm dia rod.

S364

To suit 25.0mm fabric strap Material: Nickle Plated steel
Ends welded together for additional strength
Dimensions: 40.0mm outside width x 30.0mm total height x 5mm dia rod.

S365

To suit 25.0mm fabric strap Material: 316 grade stainless steel
Ends welded together for additional strength
Dimensions: 38.0mm outside width x 32.0mm total height x 5mm dia rod.

S366

To suit 50.0mm fabric strap Material: Nickle Plated steel
Ends welded together for additional strength
Dimensions: 63.0mm outside width x 58.0mm total height x 6mm dia rod.

S368

To suit 50.0 mm fabric strap Material: 316 grade stainless steel
Ends welded together for additional strength
Dimensions: 63.0mm outside width x 58.0mm total height x 6mm dia rod.

SSPE-1

Square Eye Pad – Small made from 316 grade stainless steel
Dimensions:
30mm wide x 35mm long
21mm high
2.5mm thick plate
5mm Ring width

SSPE-2

Square Eye Pad – Medium made from 316 grade stainless steel
Dimensions:
35mm wide x 40mm long
26mm high
2.5mm thick plate
6mm Ring width

SSPE-3

Square Eye Pad – Large made from 316 grade stainless steel
Dimensions:
40mm wide x 50mm long
32mm high
3mm thick plate
8mm Ring width

Marine Products

Thumb Screws

S310B

3 Eared Thumb Screw x 1" long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Suits all Saint nylon Knuckles and Deck Mounts

Colour: Black

S310W

3 Eared Thumb Screw x 1" long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Suits all Saint nylon Knuckles and Deck Mounts

Colour: White

S311B

3 Eared Thumb Screw x 20mm long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Only suit Saint Deck Mounts including S250, S252, S253 and S810

Colour: Black

S315B

2 Eared Thumb Screw x 1" long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Suits all Saint nylon Knuckles and Deck Mounts

Colour: Black

S315W

2 Eared Thumb Screw x 1" long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Suits all Saint nylon Knuckles and Deck Mounts

Colour: White

S315R

2 Eared Thumb Screw x 1" long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Suits all Saint nylon Knuckles and Deck Mounts

Colour: Red

S316B

2 Eared M6 Thumb Screw x 1" long

M6 Metric Thread

Material: UV Stabilised Nylon 6

Colour: Black

S317

2 Eared M8 Thumb Screw x 1" long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Colour: Black

S318

2 Eared M8 Thumb Screw x 2" Long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Colour: Black

S319

2 Eared M8 Thumb Screw x 55mm Long

1/4" UNC Thread

Material: UV Stabilised Nylon 6

Colour: Black

Please note SAINT can manufacture any colour thumb screw you like. Please contact us for other colour choices and options.

Marine Products

Bimini Accessories

S328B

Suits 25.0mm O.D. x 1.6mm wall thickness aluminium tube

Allows two 25.0mm O.D. tube to be connected at a 90 degree point

Material: UV stabilised nylon 6

Colour: Black

S330B

Suits 20.0mm x 1.6mm wall thickness aluminium tube

Comes with two eared thumb screw (S315B) which secures side A to side B through a 1/4" UNC hex nut

A slight release in tension of the thumb screw allows the fitting to ratchet to differing positions/ angles.

The Elbow Joint has multiple centrally located teeth to fasten a desired angle in place.

Similar to an Umbrella Joint.

Material: UV stabilised nylon 6

S332B

Suits 25.0mm x 1.6mm wall thickness aluminium tube

Comes with two eared thumb screw (S315B) which secures side A to side B through a 1/4" UNC hex nut

A slight release in tension of the thumb screw allows the fitting to ratchet to differing positions/ angles.

The Elbow Joint has multiple centrally located teeth to fasten a desired angle in place.

Similar to an Umbrella Joint.

Material: UV stabilised nylon 6

S332

Suits 25.4mm x 1.6mm wall thickness stainless steel tube

Comes with two eared thumb screw (S315B) which secures side A to side B through a 1/4" UNC tapped thread

A slight release in tension of the thumb screw allows the fitting to ratchet to differing positions/ angles.

The Elbow Joint has multiple centrally located teeth to fasten a desired angle in place.

Similar to an Umbrella Joint.

Material: 316 grade stainless steel

S340B

To suit 25.0mm O.D. aluminium tube

Tower Clamp designed to hold two poles parallel, 55.0mm apart (centre to centre).

89mm L x 30mm W x 34mm H

Material: Extruded aluminium section

Colour: Black powder coated

S342B

To suit 25.0mm O.D. aluminium tube

Tower Clamp designed to hold two poles parallel, 55.0mm apart (centre to centre).

89mm L x 50mm W x 34mm H

Material: Extruded aluminium section

Colour: Black powder coated

S346

Suits 25.0mm O.D. aluminium tube

Rocket Launcher designed to suit 40mm fishing rod handles.

Material: Aluminium

Colour: Bright silver anodised

S350B

Suits 25.0mm O.D. aluminium tube

Designed to secure two poles parallel in a temporary manner

Material: UV stabilised nylon 6

Colour: Black

Tonneau Loops

S600B

50mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia.

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. Fastener

Colour: Black only

S601B

70mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "130"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener Colour: Black

S601W

70mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "130"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener Colour: White

S602B

80mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "150"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener Colour: Black

S602W

80mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state Also known as a "150"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: White

S603B

90mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state Also known as a "170"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: Black

S603W

90mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state Also known as a "170"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: White

S604B

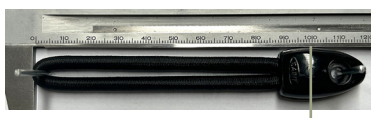

100mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state Also known as a "190"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener Colour: Black

Tonneau Loops Cont'd

S604W

100mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "190"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: Black

S605B

110mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "209"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: Black

S605W

110mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "209"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia.

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. Fastener

Colour: White

S606B

130mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia.

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. Fastener

Colour: Black only

S607B

160mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "310"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: Black

S609B

210mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Also known as a "400"

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: Black

S611B

260mm long

Length measured from centre of mounting hole in plastic head to end of elastic cord in relaxed state

Material: UV stabilised nylon 6 and woven fabric covered elastic cord 6mm in dia

Elastic cord is secured using a 316 stainless steel clip and sealed into nylon body head through ultrasonic process.

Comes with a nylon button which covers the 4mm dia. fastener

Colour: Black

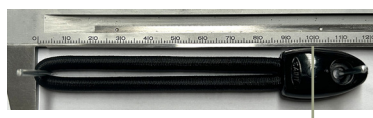

S610

Snap and Press Tool Rivet Punch

High Tensile Steel – heat treated for extended durability

Helps secure the durable fastener to the tonneau loop body head

Can be used with a "G" clamp or other hardware

Measuring Guide for Tonneau Loop;
Measure Length from edge of loop when taught to centre of head.
Eg: S604B is a 100mm Long Loop

Marine Products

2 Bow Canopy Kits

S170S-Small
Frame:

25.0mm O.D. x 1.6mm wall thickness
Bright Silver anodised aluminium
Comes w/ camber (roll) across the beam

4 x half bows to make 2 Bow Canopy

Dimensions once assembled:

- Beam 1800mm
- Main leg 800mm
- Front leg 400mm

Fittings included (nylon):

- S209 Bow End (black) x 4
- S229 Knuckle (black) x 2
- S253 Deck Mount (black) x 2
- S286 Joiner x 2

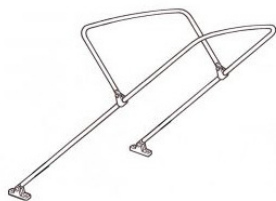

The frame DOES NOT include fabric.

Other alternatives:

White fittings can be changed.

Black Powder Coated.

Please enquire for availability.

S172S-Large 1.6mm
Frame:

25.0mm O.D. x 1.6mm wall thickness
Bright Silver anodised aluminium
Comes w/ camber (roll) across the beam

4 x half bows to make 2 Bow Canopy

Dimensions once assembled:

- Beam 2100mm
- Main leg 800mm
- Front leg 400mm

Fittings included (nylon):

- S209 Bow End (black) x 4
- S229 Knuckle (black) x 2
- S253 Deck Mount (black) x 2
- S286 Joiner x 2

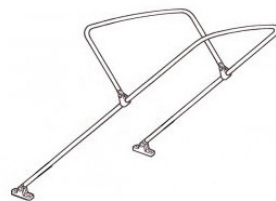

The frame DOES NOT include fabric.

Other alternatives:

White fittings can be changed.

Black Powder Coated.

Please enquire for availability.

S172S-Large 3mm
Frame:

25.0mm O.D. x 3.0mm wall thickness
Bright Silver anodised aluminium
Comes w/ camber (roll) across the beam

4 x half bows to make 2 Bow Canopy

Dimensions once assembled:

- Beam 2100mm
- Main leg 800mm
- Front leg 400mm

Fittings included (nylon):

- S208 Bow End (black) x 4
- S229 Knuckle (black) x 2
- S253 Deck Mount (black) x 2
- S283 Joiner x 2

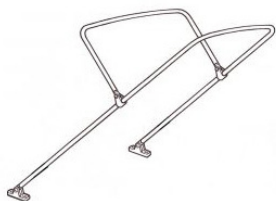

The frame DOES NOT include fabric.

Other alternatives:

White fittings can be changed.

Black Powder Coated.

Please enquire for availability.

S172SS
Frame:

25.4mm O.D. x 1.6mm wall thickness
316 grade mirror polished stainless
steel round tube

Comes w/ camber across the beam

4 x half bows to make 2 Bow Canopy

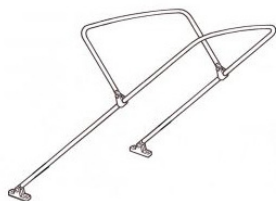

Dimensions once assembled:

- Beam 2100mm
- Main leg 800mm
- Front leg 400mm

Fittings included (stainless steel):

- S215 Bow End External x 4
- S225 Knuckle x 2
- S252 Deck Mount x 2
- S285 Joiner x 2

The frame DOES NOT include fabric.

S180ss
Frame:

31.8mm O.D. x 1.6mm wall thickness
316 grade mirror polished stainless
steel round tube

Comes w/ camber across the beam

4 x half bows to make 2 Bow Canopy

Dimensions once assembled:

- Beam 2100mm
- Main leg 800mm
- Front leg 400mm

Fittings included (stainless steel):

- S217 Bow End External x 4
- S227 Knuckle x 2
- S255 Deck Mount x 2
- S287 Joiner x 2

The frame DOES NOT include fabric.

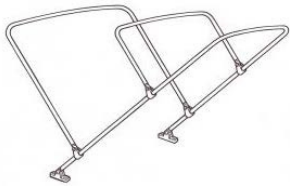

Other alternatives:

Gold Plated fittings can be changed.

Please enquire for availability.

NEW CLEAN GREEN SAFE

HOW DO THEY WORK?
AIR passes through the linen cover to the porous Bamboo Charcoal which **absorbs** odours, allergens and moisture. The natural filtering helps prevent mould, mildew and bacteria from forming.

WHERE TO USE?
DEODORISE your home, from bathroom to kitchen to pet area. Refresh personal spaces in hospitals & retreats. Perfect for your car, caravan or boat.

HOW LONG DO THEY LAST?
KINGPIN sustainable ECO PACKS have a lifespan of 2 years & are reactivated by placing them in direct sunlight for 1 hour a month. The UV light disperses the moisture and odours and attacks the protein of viruses.

SHOP ONLINE AT: www.kingpinpegs.com.au

Follow

Three Easy Steps

- 1 Reuse up to 2 years**
With simple maintenance our Charcoal Bamboo Bag are reusable for up to 2 years. From a cost perspective it will save you money. From a health perspective it will help you to have a cleaner air.
- 2 Rejuvenate with sunlight**
Once a month place your bag under the sunlight. The UV rays will clear out the Bamboo Charcoal pores making it ready to absorb again.
- 3 Recycle into your garden**
After 2 years, the Bamboo Charcoal Bag will make an excellent addition to your garden. Simply cut open the bag and sprinkle the charcoal into the soil, where it will help plants to absorb moisture and nutrients.

Eco packs available in both 6" and 8" sizes

Custom Designs and Sizes are available upon request, contact us for more information.
